

ANTONIO COLONNA

Jewelry Experience

LIVE THE  
EXPERIENCE  
OF THE JEWEL

# A JEWEL FOR EVERY STORY

*Creative power is mightier than its possessor*

Sooner or later everyone realises that there are unrepeatable moments and that those unique gifts capable of arousing in us, and in those who will receive them, shivers to the skin and tears of joy, should be celebrated. This is where desires are born and very often they are so profound as to be able to excite both us and those dear to us.

The jewels that I make allow people to tell the true and authentic stories of those who commission them and those who will receive them as gifts.

You can be a guest or a collaborator and I will be happy to show you the secrets of my profession by involving you in the phases of conception and creation of the jewel.

You will be able to try on a preview of your creation thanks to 3D design and prototyping.

Technological and digital tools, alongside the ancient techniques of Italian goldsmithing, will be at your service. Authenticated expertise and gemological analyses will legally guarantee the value of your investment, whilst having a unique experience that will make your jewel even more precious still.

# GOLDSMITHS FOR A DAY

*We do not live to accumulate things, but experiences*

It is a symbolic ritual where creation is not only an artisan experience but above all an occasion in which to forge indelible memories to be carried in the heart for a lifetime. A blend of emotions and magic that my customers will experience in my workshop.

A very rare workshop dedicated to all married couples in which she creates the ring for him with her own hands and vice versa.

The workshop requires mandatory reservation and includes the rental of the workshop along with the goldsmith master, a photographic reportage and a luxury break with typical Apulian cuisine.

# NARRATIVE JEWELS

*Living substance, which releases emotions and sensations, art*

Narrative jewels are not objects related to the body but to the soul, and for this reason they have the ability to transport the stories of real people between generations, over time. Being the protagonists of their own stories, the clients become the directors of creation. The narrative wedding rings are, for the couple, the symbol of a love story to be told through the rediscovery of sensations, memories and dreams.

Thanks to the 'Inspiration Game', it will be possible for me to plan a journey made up of creative and artisan experiences combined with authentic emotions that will merge forever in the creation of the narrative jewel.

# JEWELLERY VACATION

*The greatest joy is that which was not expected*

Uniting the magic of a stay between the enchanting beauties of Puglia and Basilicata with an extraordinary experience in my laboratory between; A Narrative Jewel or Goldsmiths for a day.

This will be a special adventure where you can forge your memories amidst unforgettable places and flavours, unique in all the world. It could be a surprise for your partner or a shared experience.

It is divided into two parts; creative and artisanal. Design and prototyping of the 3D jewel online in screen sharing. Forging the jewel in front of your eyes or with your very own hands.

There are very few places in the world where you can get this type of experience in such a secure and intimate setting. I am certain you will have fun and that you will find it an unforgettable Jewellery Vacation.

The Jewellery vacation can be for an engagement proposal or a marriage proposal or simply to make fantastic memories to take home with you in your heart.
